The High Point Market showroom complements Hinkley's showroom at Dallas Market Center

AVON LAKE, Ohio – Lighting and ceiling fan designer and distributor Hinkley is headed to High Point Market this fall, where it will open an over 8,000 square-foot showroom in the Historic Market Square building.

The 99-year-old company will open its showroom on the second floor of the building, in space #290, which is part of its infrastructure and investment plan. The showroom will showcase designs from Hinkley, luxury brand Fredrick Ramond and the Lisa McDennon collection and such lighting categories as interior and exterior, bath and vanity options, ceiling fans, outdoor living and fixtures for hospitality.

“High Point is the perfect complement to our destination showroom at Dallas Market Center,” said Hinkley President Jess Wiedemer. “This new showroom will help increase exposure of our brand as we continue to find new ways to support our lighting showrooms, designers and industry professionals.”

He continued, “We’re looking forward while still honoring our heritage, which is rooted in thoughtful design, a passion for growth and a commitment to our customers.”

“We are delighted to welcome Hinkley to High Point Market this October,” said Julie Messner, senior vice president of furniture leasing and home décor at International Market Centers. “Their nearly 100-year reputation of producing high-quality designs makes them an invaluable resource to the design community and a dynamic addition to the High Point Market roster this fall.”

Hinkley selected long-term partner Lisa McDennon to design the showroom; she redesigned Hinkley’s Dallas showroom in 2012.

“It’s a pleasure to be part of the Hinkley team and create a showroom that reflects the forefront and the future of what’s happening in the design world,” said McDennon, whose collection with Hinkley debuted in 2018. “Visitors to the Hinkley showroom during High Point Market will be inspired by seeing how lighting transforms a space while supporting the latest home furnishing trends.”
